Data Analyst with 4 years' experience optimizing pricing strategies. Achieved a 20% sales conversion increase and 30% inventory reduction. Proficient in SQL, Power BI, and AWS; drives data-driven decisions through innovative insights.

WORK EXPERIENCE

Data Analyst EliteColumn - Analyzed online automotive marketplaces to identify competitive pricing benchmarks and sales trends across used vehicle segments, resulting in a 15% increase in pricing accuracy. - Assisted in setting optimal price points based on vehicle conditions, reconditioning status, and customer demand patterns, leading to a 20% improvement in sales conversion rates. - Maintained vehicle inventory database with accurate listing updates, availability status, and pricing revisions, achieving a 30% reduction in inventory discrepancies. - Created performance dashboards and weekly reports to support pricing strategy for commercial listings, enhancing decision-making speed by 25%. - Utilized Excel (pivot tables, lookups) and internal BI tools to clean and structure pricing and inventory datasets, increasing data processing efficiency by 40%.	Apr 2024 - Sep 2024 Melbourne, Australia
Data Scientist Positive Integers Pvt Ltd - Refactored CI/CD pipelines for HDFC Banca pricing model using AWS (S3, EC2, Lambda) and Bitbucket, reducing deployment time by 40% and AWS resource cost by 90%. - Collaborated with Sales team to respond to client pricing requests and quantify portfolio impact of pricing scenarios across retail energy products, enhancing response efficiency by 25%. - Enhanced solar firm's lead-to-sale conversion scoring model with K-Prototypes clustering, improving targeting precision by 18% and reducing scoring time by 35%. - Spearheaded steel price forecasting with external API integration (weather, commodity), leading to a 7-day trend classifier with 82% accuracy that improved procurement planning and reduced quarterly losses by 15%.	Sep 2021 - Jan 2023 India
Data Analyst RR Engineering Works - Built Tableau dashboards to monitor inventory levels, logistics KPIs, and lead times—enabling proactive decisions across supply chain teams. - Designed and implemented data models that improved inventory forecasting accuracy and reduced overstock/stock outs by 20%. - Automated Excel reports using VBA and standardized KPIs, reducing reporting effort by 30%. Responded to time-sensitive pricing model updates and commercial requests in high-stakes operational environments. - Utilized SQL, Microsoft Excel, Power BI, and Tableau to analyze large datasets, perform root cause analysis, and deliver insights to stakeholders.	Apr 2019 - Sep 2021 India

EDUCATION

Master of Data Analytics Queensland University of Technology Project: Analyzed NEM spot prices to support commercial electricity pricing decisions and validate competitiveness in SME and C&I segments.	Apr 2023 - Feb 2025 GPA: 4.91
Post Graduate Diploma Analytics and Artificial Intelligence Imarticus Learning Project: Fraud transaction detection using Kaggle financial data	Dec 2021 - Jan 2022 GPA: 6.5

PROJECTS

Deloitte Australia- Data Analytics Simulation  Analyzed IoT telemetry from 4 global factories to uncover equipment downtime trends, enabling predictive maintenance strategies; built Tableau dashboards with drill-down filters and custom KPIs to streamline performance monitoring; designed Excel-based classification model to expose gender pay disparities by role and location, influencing DEI initiatives; applied ethical analytics frameworks to ensure compliance with corporate governance and HR equity standards.	May 2025 - Present
Interactive Sales Dashboard  Built a Power BI dashboard to visualize sales trends, category breakdowns, and profitability across regions. Demonstrated advanced filtering, transformation, and stakeholder communication.	Dec 2024 - Present
News ETL Pipeline  Built an automated ETL pipeline to extract, clean, and load structured news data into SQLite. Enabled down stream topic modeling and public reporting insights.	Nov 2024 - Present

SKILLS

Tools: Power BI, Tableau, Excel (Pivot Tables, VBA, Power Query), DAX

Languages: SQL, Python (Pandas, NumPy), R
Platforms: SQLite, Airflow, AWS (EC2, Lambda, S3), Azure Databricks
Other: KPI Reporting, NEM Analysis, Pricing Models, Agile, Stakeholder Engagement
Soft Skill: Time Management, Attention to Detail, Communication, Innovative Thinking

LANGUAGES

English (Professional working proficiency)

PUBLICATIONS

Smart Shopping Trolley and Stock Management System [🔗](#) on **IJCESR** **Mar 2019**
Designed an RFID-based smart shopping trolley integrated with Bluetooth and ZigBee modules **to automate billing and track inventory**, resulting in reduced checkout time and real-time stock updates for both consumers and distributors.
